

National Health Systems Resource Centre

*Technical Support Institution with National Rural Health Mission
Ministry of Health & Family Welfare Government of India*

To Whomsoever It may concern

This is hereby certified that Taurus Glocal Consulting Services Pvt. Ltd.
has executed a project to provide technical assistance to NHSRC to contribute to defining “**Meta Data & Data Standards for Health Domain**”. This project involved:

- Develop a data dictionary of Common Data Elements for health domain following existing standards such as ICD-10, CCI, CPT, LOINC, SNOMED etc.
- Develop Meta Data standards for each of the data element and code directories of master data.
- Recommend intuitional mechanism for interoperability solution following interoperability standards such as HL7, SDMX.HD, CCD, CCR DICOM etc.
- Design an integration framework between existing systems.
- Recommend integration methods for aggregate based systems and name based systems such as HMIS and patient tracking systems, HMIS and EMR based Hospital Information Systems.

This project was started in July 2013 and completed in Nov 2013. Taurus Glocal Consulting Services was able to provide all the outputs expected of them for this 4 months assignment on time and with good quality.

The contribution of Taurus Glocal was critical to the successful outcome of this task: the dissemination of the draft Meta Data & Data Standards for Health Domain on 12th December 2013.
